LinkedIn: [linkedin.com/in/vicente-llobregat-web-backend/](https://www.linkedin.com/in/vicente-llobregat-web-backend/)

Professional Profile

Senior developer with over 5 years of experience in software engineering, system architecture, and interactive applications. Hybrid profile specialized in designing decoupled components in Unity and maintainable enterprise backend under advanced API design principles. Expert in solving complex problems with a pragmatic approach.

Skills

- **Languages:** C#, Python, C/C++, JavaScript
- **Backend & APIs:** .NET Core, Django REST Framework, RESTful API, RBAC, OAuth, OCC.
- **Databases:** PostgreSQL, SQL Server, MySQL, MongoDB, Redis (Cache).
- **Architecture & Design:** Clean Architecture, DDD, CQRS, Vertical Slices, Modular Monolith, Screaming Architecture, SOLID, KISS, DRY, OOP.
- **DevOps & Cloud:** Azure, Oracle, Firebase, Docker, Docker Compose, GitHub Actions (CI/CD), OpenTelemetry.
- **Testing & Quality:** TDD, Unit/Integration/Functional Testing, Code Coverage.
- **Game Development:** Unity (2D/3D), Editor Scripting, Tooling, Multiplayer, UI/UX.
- **Management & Tools:** Git (GitHub, SourceTree, Fork), Scrum, Kanban
- **AI-Assisted Development:** Cursor, Windsurf, Copilot, Claude (Refactoring, Debugging, Cycle Optimization).
- **Technical English:** Intermediate — Proficient in technical reading, documentation, and code writing.

Professional Experience

TGA COMPANY — Backend & Unity Software Developer

January 2025 – January 2026

- **Architecture design:** Co-designed a modular structure based on Clean Architecture and Vertical Slices, drastically reducing the team's learning curve.
- **Technical development:** Built fast-iteration REST APIs with Django and implemented critical game mechanics along with native UI/UX in Unity.
- **Technical debt mitigation:** Proposed and implemented architecture solutions to isolate legacy code, ensuring operational continuity of active mini-games during system migration.

October 2022 – February 2023

- **Gamification:** Developed gamified applications by implementing business logic, UI, and core mechanics.

CLOUDLABS LLC — Unity Software Developer

September 2023 – February 2024

- **Operational maintenance:** Ensured stability of cross-platform educational simulators through refactoring tasks and production bug resolution.
- **Mobile optimization:** Collaborated on technical upgrade processes and performance optimization for applications on iOS and Android.

TORO LABS COLOMBIA S.A.S — Unity Software Developer

September 2020 – June 2022

- **UI/UX architecture:** Designed and implemented highly resilient, reusable interface components, abstracting logic through interfaces, composition, and optimized async programming.
- **Workflow automation:** Built a custom Unity Editor tool to automatically translate Photoshop coordinates into the engine, completely eliminating manual scene assembly.

Featured Projects (R&D)

- **High-availability architecture:** Designed and implemented a decoupled high-availability architecture with endpoint versioning, optimistic concurrency control (OCC), and secure transaction mechanisms through idempotency.
- **Automation & DevOps:** Automated the continuous integration and deployment (CI/CD) pipeline for cloud environments, incorporating advanced instrumentation with OpenTelemetry for distributed monitoring and automated test suites.

Education

Bachelor's Degree in Computer Science

Universidad de Carabobo — Faculty of Science and Technology (FaCyT), Valencia, Venezuela

Certifications

- [Specialization: C# Programming for Unity Game Development — Coursera](#)
- [Professional Course in Software Architecture — Platzi](#)
- [Clean Architectures for Software Development — Platzi](#)
- [TDD and Unit Testing with .NET Core — EDteam](#)
- [Building REST APIs with .NET Core — EDteam](#)

Softskills

Teamwork · Effective communication · Problem solving · Technical leadership · Analytical thinking · Adaptability · Mentoring and training · Time management
